Volume per acre: Cords/acre-Tons/acre
$72,000  
Cord Equiv. – 12.0/acre  
27 Tons/acre

SALE OBJECTIVES:  
Third thinning red pine stands were marked to select the straightest trees between 13 and 17 in. DBH that could potentially make telephone poles. BCPL doesn’t want the straight trees to grow beyond telephone pole specifications and miss the opportunity to bring this product to market. All marked trees are between 12 and 19 inches DBH. The average marked tree is near 15 inches DBH with 7 sticks (.44 cords/tree). We estimate that 61% of the marked trees (1,301 trees) are pole quality and 848 log quality.

Access & Terrain - Direct access either from County Hwy Y or the Willow Dam Rd. Terrain is flat or rolling hills with sandy ground. Skidding distances are short. Trees were marked high so that they are visible above the brush. With abundant roads and wide spacing between trees, there should be plenty of room to handle pole-length material.

OTHER SALE REQUIREMENTS AND CONDITIONS:
- The BCPL can restrict the type of equipment used on the job if conditions or damage warrant.
- BMP’s (see Field Manual PUB-FR-093-2010) are mandatory for this sale.
- Notify the BCPL (715-277-3366) before you start the job.
- All products such as telephone poles, pulpwood, or sawlogs are sold by the cord. The Contractor shall decide how to cut and market the marked trees.
- Most of the poles are class 3 with some class 2 and 4. BCPL didn’t mark any class 5 poles.
- BCPL didn’t include any trees below 13 inches DBH or less than 42 feet in length in its telephone pole estimates.
